Read the letter to the editor of the Central High School Newspaper and then answer questions 1-6.

Dear Editor,

I am a student in the 12th grade and in a few weeks I am going to finish school. During the last year, I took part in a wonderful project: Project GreenTeens. I am writing to share my experience with you.

5 The purpose of GreenTeens is to learn by doing. The project taught us how to become active in our community and how to help the environment. During the first two months of the project, we learned about local environmental and community problems. With the help of our teachers, we suggested practical solutions to the problems. Then we were ready to begin working. We divided our class into three groups and each group
10 chose a different task.

One group learned how to make toys from natural materials. They made more than one hundred different kinds of toys and donated them to the children's hospital.

Another group of students learned different ways to save water. They went from house to house and explained to people how to use less water. They gave each
15 family special devices to put on their faucets. This reduced the use of water in the city by 10%!

The city gardener helped my group to find neighborhoods that didn't have public gardens. He also taught us which plants do not require a lot of water. During the year, my group planted five new gardens around the city. People now have green places to
20 sit and relax!

GreenTeens had a great influence on all of us. We learned how to work together as a team and how to solve real problems. I really recommend it to all high school students.

Yours,
Susan Clark
